Kirill Topolyan — Full Stack Web Developer

kirill@topolyan.com | http://topolyan.com/ | https://github.com/k-topolyan

My name is Kirill Topolyan, I love the Web and technologies. Currently I'm located in Ukraine.

I was always interested in the Internet and computers, years ago I started with the creation and advertising of my own sites (which were quite successful), then I had a lot of related experience for customers.

Now I prefer to use Ruby on Rails and AngularJS, however I am open to other development environments and have worked with a diverse range of skills and technologies.

I am highly purposeful, I am learning extremely fast and ready for new challenges.

I could also talk about hobbies (for example, the humanities that I have studied, or sports), but I'm not going to waste your time, we're talking about work.

SKILLS

Programming languages and technologies: Ruby, JavaScript, HTML/CSS

Frameworks and CMS: Rails, AngularJS, Bootstrap, WordPress

Databases: PostgreSQL, MongoDB

Other: Git, Linux, Heroku, SEO, website maintenance
